

## **POWER CPS**

10-100 kVA

STAND ALONE THREEPHASE UPS

#### The ideal solution for:

- ✓ EMERGENCY LIGHTING
- ✓ FIRE PROTECTION SYSTEMS
- ✓ ALARM SYSTEMS
- ✓ SMOKE EXTRACTORS

## **OVERVIEW**

**POWER CPS** is the UPS designed to satisfy all the requirements of the **EN-50171** and **EN-62040** standards, whilst ensuring very high performance. The system is specifically designed for use in applications that are subject to safety standards, such as **fire prevention systems**, **emergency lighting systems**, **smoke extraction equipment** and **carbon monoxide detection**.

This UPS back-up, available both in the single-phase and three-phase version, is suitable for high power ratings, up to 100 kVA.

Compliant with **EN-50171** 

Compliant with **EN-62040** 

The system has a large power reserve, in fact, as specifically required by the EN50171 standard, POWER CPS is designed and sized to permanently manage an **overload at 120%** of the rated power.

## HIGH PERFORMANCE

POWER CPS is the best solution for powering emergency devices and alarms because it guarantees maximum performance in the CPSS sector, e.g. **efficiency of up to 96% in Normal Mode**, as well as for high power ratings.

The UPS also features cutting-edge components such as the standard supply double input, rectifier and IGBT inverter.

The UPS has protection against polarity inversion: this function guarantees the safety of maintenance workers whilst avoiding any damage if the batteries are inadvertently connected with the incorrect polarity.

The advanced battery management system also allows you to adapt the charging voltage according to the temperature and to prevent overheating and overloading of the batteries. The expected life of the batteries is thus extended and charging times are optimised.

POWER CPS has a standard supply **double input**. This important function ensures easier and safer maintenance of the UPS as well as allowing the use of two different power sources.

It is, in fact, possible to perform periodic checks using a specific input switch which interrupts the system power supply whilst leaving the bypass line active.

## **PRODUCT RANGE**

#### CPS-TM / TT

System available in both the single-phase and three-phase version (1/1, 3/1, 3/3), with different power ratings from 6 to 40 kVA. The cabinet can hold up to 3 strings of 40 internal batteries.

Power Factor 1

Efficiency up to 96% in Normal Mode.

#### CPS-TT1

Three-phase system (3/3) available in version with power from 40 to 100 kVA.

Power Factor 0.9

Efficiency up to 96% in Normal Mode.

#### CPS-TM3 / TT3

System available in both the singlephase and three-phase version (3/1, 3/3), with different power ratings from 6 to 100 kVA.

Power Factor 0.9

**Efficiency up to 92,7%** in Normal Mode.

## COMPLIANT WITH EN 50171

- Fast battery charging: 80% charge in 12 hours
- Battery protection from damage resulting from reverse polarity
- Battery protection against deep discharges
- Long life battery with expected 10-year life
- Designed to hold 120% of the rated charge
- Metal housing with IP20 rating compliant with the EN 60598-1 standard

# MAIN APPLICATIONS

#### **EMERGENCY LIGHTING**

Emergency exits, evacuation route, panic lightings, high-risk areas illumination.

#### **FIRE ALARM**

Automatic fire extinguishing systems, sprinkler systems, water-mist systems.

#### **SMOKE DETECTION**

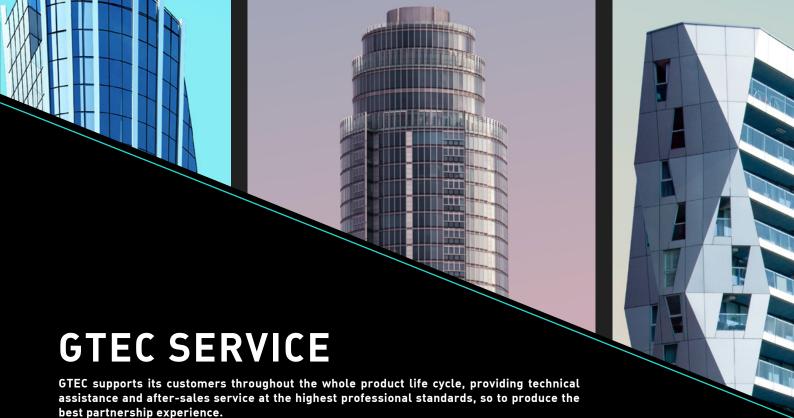

Smoke extraction equipment and carbon monoxide detection devices.

**MAINTENANCE** is an essential activity in order to guarantee a safe and stable load protection. GTEC shows maximum care about this topic, providing the best service in terms of experience, instrumentation and safety level.

The **TECHNICAL SUPPORT** service, delivered through the dedicated Help Desk platform, guarantees prompt answers to customers' requests and allows them to directly schedule maintenance activities.

The partnership between GTEC and its customers gets consolidated through the **TRAINING SESSIONS** proposal for technical staff, so that each user can operate on the UPSs with maximum consciousness and safety.

Also, in the GTEC Service offers, a **PROJECT CONSULTING** team is available, in order to provide the best solution according to the designer's needs.
